1. What is Baccarat staking?

You have probably heard of “staking” in poker: You put up cash on behalf of a professional player (you’re his “backer”) in exchange for a cut in the profits. In return, the backer takes some of the loss risk.

When the player wins the backer wins, too. Vice versa, when the player loses the backer also loses part of his stake.

So even if you’ve never played poker before – **as the “backer” of a professional player you can earn a share in the winnings without actually having to play yourself.**

As in poker, it’s no different in **baccarat** – **one of the most popular casino card games in the world.**

So let's assume you're not a natural gambler or you simply have not got the time or the skills to try your luck in a game of baccarat yourself. Or perhaps your nerves just aren't strong enough.

But the idea of challenging your luck and, of course, the prospect of large profits still excite you...

Then staking might be just the right thing for you and offer you an **exciting passive income opportunity in the gaming/gambling industry** - without even having to play yourself.

Not only is the risk very manageable and backers can **cash out anytime** on our platform. You do not even have to commit yourself, have your funds locked up or anything – all you need is an **active stake of 200 USD** and you're ready to **let your money work for you!**

Even at the lowest entry level starting at 200 USD – you're a "tester" and have zero referrals – you have a 20% share in the daily winnings and can expect net profits of about 4% in the very first month.

Depending on the size of your stake, your share in the daily profits can grow as high as 50% or 60% – which equals monthly net profits of approx. 10% – 12%.

Granted, there are **no guaranteed returns** – after all, baccarat is a casino game and, as such, it's a game of chance. Therefore, staking should be seen rather as an **entertainment business**, not so much as an investment.

On the other hand, the (gross) results of the last months obviously speak for themselves:

July 2023	15.62%
August 2023	17.18%
September 2023	16.98%
October 2023	16.11%
November 2023	17.09%
December 2023	9.96% (only 13 runs)
January 2024	13.84% (only 19 runs)
February 2024	16.98%
March 2024	16.36%

In addition, you can **build a team** by referring other backers to our platform and so get an even bigger piece of the cake by earning from referrals.

The higher your stake is or the bigger your team grows, the bigger are your monthly earnings.

2. How does Baccarat staking work & how (much) can I earn?

If a player wants to succeed in any casino game, simple logic dictates the following: The loss risk (which can never be completely ruled out) must be reduced to a minimum and winnings must be higher than losses.

In order to achieve this, the player must play responsibly and follow a fixed set of rules – he must have a system, a *strategy* – and certainly have strong nerves.

Our staking platform Baccarat-Entertainment.com has therefore partnered up with a small team of players who fulfill those very requirements. They play up to **5 days a week – Monday to Friday** – currently mostly online.

There are two options how you can benefit from this and **earn a passive income with Baccarat staking**:

- You simply **stake your own money** and gain profits every week. All you have to do every day is check the results in your back office, cash out or re-stake (compound) your winnings.
- Or you share your experience with family and friends and let them take part in your success. You **build an own team of active backers and earn commissions from your direct referrals**.

Now let's dig a bit deeper into both options.

2.1. Direct win sharing

Every backer has a **direct share of 20-60% in the winnings**. **The larger a backer's active stake is, the higher his potential winnings are.**

<i>Rank</i>	<i>Active stake</i>	<i>Share</i>
Tester	200-999 USD	20%
Advanced	1,000-9,999 USD	30%
Pro	10,000-19,999 USD	40%
Elite	20,000-49,999 USD	50%
Diamond	50,000+ USD	60%

For example: If your stake is below 1,000 USD you're a "tester" and have a share of 20% in the winnings.

Let's say the winnings on a given day are an even 1% and you're a tester. Then your personal gain is 20% of that 1%, i.e. 0.2%. So if your stake is, for example, 500 USD you earn 1 USD on that day.

If your stake is, e.g., 20,000 USD you're an "elite" backer and have a share of 50% in the winnings. So if the player wins 2% you earn 1% on your personal stake – that's 200 USD in a single day!

So simply **by having a share in the total active stake of our platform, each backer can earn a passive income** and watch his money grow continuously. All you need is an active stake of at least 200 USD and you have a **20-60% share in the profits**.

Stop Loss Protection

Of course, our players *do not win every day* – that’s simply the nature of a game of chance.

Therefore, our players have a **stop-loss-limit** which requires them to stop once a certain loss amount has been reached.

What is more: Even if a player *does* lose from time to time (and losses are rather rare), a backer can never lose more than what his *percentual share in the winnings* – according to his rank or stake level – is.

A backer on our platform never loses the full percentage, but only 20-60% of the percentage loss. The remaining loss amount is *covered by the system*.

For example, a „tester“ – with a share of 20% in the winnings – can never lose more than 20% of the percentage loss. So if the loss on a given day is an even 1% he will lose only 0.2% of his personal stake.

Build more wealth by re-staking your winnings

Now you can cash out your winnings every day if you like or – you **re-stake** them. “Re-staking” means that you re-add your daily winnings from your e-wallet to your active stake – increasing your gains continuously.

By simply **compounding your winnings**, your stake will automatically grow over time. All you have to do is log into your dashboard every weekday – this doesn’t even take a minute – and re-stake your winnings.

Of course, you can also **cash out every day** – **you’re free to withdraw your profits or stake anytime**. After all, this is not a fixed deposit. It’s *you* who decides how to play the game.

2.2. Referral system: Build a team and earn extra cash

In addition to direct win sharing, every backer has the opportunity to share his experience with others and **build a team of new backers**. As the so-called sponsor of his downline, he will then **receive commissions of up to 100% from his referrals**.

N.B. **A downline is restricted to a maximum of two levels** where a sponsor can receive commissions. E.g., if you recruit a new backer (backer 1) and this backer recruits another new backer (backer 2), then you will receive commissions on the winnings of “backer 1” and “backer 2”. However, if “backer 2” recruits another backer himself (backer 3) you will *not* receive commissions on the winnings of “backer 3”.

Building a team can be extremely rewarding because – **in addition to direct winnings** – you can earn continuous commissions for each backer you have recruited to our platform.

NB: Team building is just an option. You can but you don't have to build a downline.

And here is **how our referral system works**:

Each backer has a “**sponsor ID**” and a **referral link** that he can use to recruit new backers. Your personal referral link is available in your dashboard.

Once you have recruited a new backer his rank and share in the winnings will be determined by the size of his active stake.

Your referrals will then be listed in your downline and you earn a commission every time our players win and all backers receive their cut in the profits.

The amount of the commission received from referrals in both levels depends a) on the rank of that referral and b) his active stake. In general, commissions received from second-level referrals (indirect partners) are half of the commission received from first-level referrals (direct partners.)

Your referral's rank	Your referral's stake	Your commission in %	
		1st level (direct partner)	2nd level (indirect partner)
Tester	200-999 USD	100%	50%
Advanced	1,000-9,999 USD	50%	25%
Pro	10,000-19,999 USD	25%	12,5%
Elite	20,000-49,999 USD	10%	5%
Diamond	50,000+ USD	5%	2,5%

To give you a few examples:

- Example level 1: If you recruit a “tester” and your referral wins 2 USD, you receive a commission of 100% = 2 USD.
- Example level 1: If you recruit an “advanced” backer and your referral wins 30 USD, your commission is 50% = 15 USD.
- Example level 1: If you have a “pro” backer in your downline and your referral wins 120 USD, your commission equals 25% = 30 USD.
- Example level 1: If you refer an “elite” backer to our platform and he wins 350 USD, your commission is 10% = 35 USD.
- Example level 2: If the “tester” from the first example (your *direct* partner) himself recruits another “tester” (your *indirect* partner) and that indirect partner wins 2 USD, your second-level commission will be 1 USD.

NB: Commissions will be paid only on **winnings made by referrals over two levels in your downline**, *not* over multiple levels.

There is no lump-sum commission for deposits either.

3. How to join Baccarat staking & add funds to your stake?

Every new backer needs a “sponsor,” i.e. a person who has invited you to our platform and most likely sent you the link to this PDF.

So if you, too, want to join our community of backers and start earning a passive income from staking on our platform, it’s recommended you **get back to that person now**.

Not only can you ask him further questions you may currently still have. You will also need his **sponsor ID to sign up** and get him to add you to our Telegram group.

Once you have signed up and gained access to your dashboard, the first thing you’ll need to do is **add funds to your stake** and maybe update your contact details.

In order to participate you’ll need an **active stake of at least 200 USD**. Detailed instructions on how to add funds to your stake are available in the “buy stake” section of your dashboard.

N.B. Although your stake will be in USD we use **exclusively cryptocurrency for payments**. This is to facilitate the payment process whenever you want to add/withdraw funds to/from your wallet and keep it as efficient as possible.

Payments must be made in **USDT (BSC, ERC-20), USDC (BSC) or BTC (Bitcoin)**. USDT and USDC are so-called stablecoins and are pegged to the US dollar. For example, if you wish to add 100 USD to your stake you can deposit either 100 USDT or 100 USDC.

Deposits in other cryptocurrencies such as BNB are available only on request.

And now the fun begins!! Every weekday from Monday to Friday – remember: our players play five days a week – the **gross playing results will be posted in your dashboard** as well as in our Telegram group.

Now you can either just watch your money continuously grow in your e-wallet – that’s where your daily cut in the profit goes – or you can restake/compound your winnings regularly, i.e. add them from your e-wallet to your active stake.

Of course, you can also **cash out anytime**, withdraw your winnings on a daily basis and even withdraw your entire stake. *Your funds are never locked but always available for you to withdraw.*

Now if our staking platform has aroused your interest and you, too, want to benefit from this exciting new passive income opportunity, please get back to the person who referred you to this PDF to sign up and start making money straight away!
